

Dmitriy (Dimi) Logunov

Senior Full-Stack Web Developer

Melbourne, Australia · 0466 966 828 · logunovdm@gmail.com · dmitriylogunov.info

Summary

Senior Full-Stack Developer with 14 years of experience, specialising in React, Next.js, TypeScript, and Vue.js. I build production web applications across regulated industries - fintech, healthcare, education, and gambling.

Most recently shipped a production customer loyalty kiosk system at Onyx Gaming (React / Next.js / TypeScript / Prisma), and built the Advanced Standing Pre-Offer system at La Trobe University (Vue / TypeScript) used by admissions staff to process credit assessments for international students.

Core Competencies

Frontend: React, Next.js, TypeScript, Vue.js, Pinia, Redux, GraphQL, SASS / LESS, Tailwind CSS, jQuery

Backend: Node.js, PHP (Laravel, Symfony), .NET, Python, Django, Drupal, WordPress

Data: PostgreSQL, MySQL, MongoDB, MS SQL, Prisma, Doctrine, Eloquent, Elasticsearch

Testing & CI: Jest, Vitest, PHPUnit, Behat, Buildkite

Tooling & DevOps: Docker, Webpack, Vite, Vagrant, Yarn / npm, Git / GitFlow, Capistrano, AWS, RabbitMQ

Ways of working: Pair programming, code review, usability testing, stakeholder communication

Experience

Senior Full-Stack Web Developer – Onyx Gaming *Jan 2026 - Apr 2026 · Contract*

I worked on a member loyalty kiosk system deployed across multiple venues, owning the UI architecture in React / Next.js / TypeScript with Prisma on the data layer. The system handles loyalty transactions and reward redemption in a regulated gaming environment, with strict usability standards for older demographics and reliable operation on kiosk hardware. I shipped an MVP to production and contributed to Stage 2 development, extending the backend as needed to support the UI.

Tech: React, Next.js, TypeScript, Prisma, PostgreSQL

Senior Web Developer – La Trobe University *Sep 2024 - Jun 2025 · Contract*

I started from the specifications document and built the UI for the Advanced Standing Pre-Offer (ASPO) system through to production and business acceptance. The platform handles credit assessments for international students and reduced admissions response times while improving student satisfaction ratings. It automates much of the workflow and matches previous study records, integrating with StudyLink and the Student Information System to help admissions staff process applications while keeping audit trails and coordinating with academics.

Tech: Vue.js, TypeScript, Vitest, PostgreSQL

Senior Front-End Developer – JET Charge *Nov 2022 - Nov 2023*

I took the prototype for the EV Charging Management Software from the previous developer and built the UI up to the Early Access testing stage with customers. I worked in close collaboration with

the backend team and hardware engineers, and ran usability testing through user interviews and iterative design refinements based on feedback.

Tech: React, Next.js, Tailwind CSS, TypeScript, .NET, DevExpress

Senior Front-End Developer – TallBob *Jan 2021 - Jul 2022 · Part-time 4/5*

TallBob had legacy software for the customer self-service portal, and the company was planning a rebrand and expansion of their business with the old system as the blocker. I was the key developer responsible for redesigning it into the modern web application, working in collaboration with the back-end developer and a junior front-end developer. The new portal increased existing-customer satisfaction, contributing to retention as well as bringing new clients in.

Tech: React, TypeScript, Laravel, PHP 7, Eloquent, Jest / React Testing Library, AWS Lambda

Full-Stack Developer – Illion *Oct 2020 - Jan 2021 · Contract*

Developed the UI for the Open Banking authorisation flow, in fully remote collaboration with a team based in Adelaide.

Tech: React, TypeScript, Laravel 6, Eloquent, PHP, SASS, Material UI, Node.js

Full-Stack Developer – Bayside City Council *Mar 2019 - Mar 2020 · Contract*

I communicated with stakeholders and third-party vendors concerning development work on the Council website and other web properties, and managed development workflows both internally and with external vendors. I also performed in-house development: SASS styling of eCouncil application forms and BAU web development.

Tech: PHP 7, Symfony, React, GraphQL, TypeScript, Drupal 7 & 8, Docker, SASS, Node.js

Senior Full-Stack Developer – Heart Foundation Australia *Nov 2017 - Nov 2018 · Contract*

My role involved managing the Foundation's web properties, communicating with third-party vendors, and implementing solutions in-house. I implemented PayPal integration into the Foundation's donation forms and delivered multiple style and design changes. I monitored the Foundation's websites through Pingdom and built-in hosting tools, and managed host records across all web properties.

Tech: PHP, ExpressionEngine 2, jQuery, CSS3, Gulp, LAMP

Full-Stack Developer – IE *May 2015 - Sep 2016 · Contract (extended)*

IE is a digital innovation agency working with clients including Telstra, Nike, Sportsgirl, Tourism Victoria, Crown, and Movember. I joined as a contractor to work on that year's Movember platform release, and after completing the project was offered an extension. I worked across a range of projects including the following year's Movember, and as a front-end developer through subcontract at Telstra Digital where I redesigned the in-store digital shopping experience.

Tech: PHP, jQuery, React, Vue, Laravel + Spark, WordPress, Drupal 8, Angular, SASS, Gulp, REST

Earlier roles – Australia and overseas *Pre-2015*

Multiple contract roles spanning PHP development, infrastructure administration, and senior support engineering.

Volunteer Project

Full-Stack Developer, PM and DevOps – koenigbicycle.ru *2006 - present*

Official web portal and social platform for a bicycle tourist club. I have built and maintained the site since 2006.

Tech: PHP, Slim, React, SASS, MySQL

Education

Master of Information Technology and Applied Mathematics

Baltic Federal University
